Student Health, Immunization and Communicable Diseases Policy

The students will follow the guidelines set forth by TSC, the clinical sites, the Centers for Disease control, Occupational Safety and Health Administration (OSHA), and any other regulatory agency affiliated with both TSC and the practicum affiliates.

GUIDELINES:

1. Students are financially responsible for their personal health care/hospitalization costs incurred while participating in the Respiratory Care Science Program.
2. Students must obtain a physical exam and submit it to the Respiratory Care Science Program before beginning clinicals. Students are required to maintain current immunizations. This includes yearly TB testing, yearly flu shots, Hepatitis B vaccine series, tetanus (every 10 yrs.), and other routine childhood immunizations. Students must be current on appropriate immunizations to be allowed in the clinical sites. For this reason, all required records must be submitted prior to the first clinical semester.
3. **If a student is unable to meet clinical objectives due to the presence of a communicable disease, a passing clinical grade cannot be obtained.**
4. In the event that a student becomes exposed to a communicable disease, the following procedures are recommended: (Hepatitis, Tuberculosis, Mumps, Measles, etc.)
 - a. Report exposure to clinical instructor, authorities in health care agencies, and educational institution.
 - b. Assess the clinical status of the source-client.
 - c. Test the exposed individual soon after possible exposure.
 - d. Retest in 6 weeks, 3, 6, and 12 month intervals with a private physician
 - e. Seek counseling and adhere to the recommendations for the prevention of transmission of infections or communicable diseases.
 - f. Confidentiality of medical records is protected and information is shared only on a strictest "need to know" basis.
 - g. Confidential screening for various communicable diseases can be obtained through the Cameron County Health Department.
