Workshop and Presentation Descriptions

Turnitin: (Workshop)

You want to promote academic integrity in your classroom, as well as evaluate student work and provide feedback. This session is for you. This presentation will provide an overview of the Turnitin Tool, and introduce you to its robust features.

Google Docs: (Workshop)

Want to learn about Google Forms and other Google Doc tools and how to integrate these tools in your Learning studio courses? This session will cover Google Forms, as well as, other Google Docs tools to simplify many of your teaching tasks and do more things than you thought possible in the classroom.

Introduction to Classroom Applications: (Presentation)

Wondering how to make your classroom more interactive, immersive, and engaging? This is the presentation for you. This presentation will introduce you to three (3) apps that you are able to utilize with your phone or tablet. Apps being presented: Bamboo paper, learning catalytics, and itunesU.

Web 2.0 teaching tools: (Presentation)

Learn about some really nifty Web 2.0 tools you can use with your students to make your classes more interactive! We will visit several Web 2.0 tool websites and let you try them out.

Good Elements of Course Design: (Presentation)

Basic elements of national and international research-based online course design presented in order to enhance student success. The design elements work with blended and face-to-face courses equally.

Classroom Media/Help Desk assistance: (Workshop)

Having trouble working the media equipment in your classroom? Are you being asked technical questions by your students and not sure how to answer? Then, this session is for you. This presentation will provide an overview of classroom media equipment, as well as, various forms of Help Desk contact information and ready reference information.

Copy Content/ExamGuard: (Workshop)

Do you have a course to reuse for another term? Are you teaching two courses simultaneously and would like to copy the content? This session is your solution. We will cover the copy course content tool. This will save you time for recreating course content

Learning Studio Interface – Creating/Uploading Course Syllabus (Workshop)

Learn how to navigate your course and create/upload your course syllabus.

Learning Studio Tools – Dropbox and Doc Sharing (Workshop)

Learn about two Learning Studio tools that you can immediately start utilizing in your courses. This session will cover the Dropbox and Doc Sharing tool. The Dropbox provides a central location where you and your students can submit and retrieve assignments and graded activities. The Doc Sharing tool can be used as a central location to share documents (powerpoints, notes, studyguides, etc.) with your students.
