

**Computer - Aided Drafting Technology  
Associate of Applied Science**

Texas Southmost College  
Science Technology, Engineering & Mathematics Division

Computer-Aided Drafting Technology (CAD) drafters produce detailed drawings with exact dimensions and specifications. They translate ideas into drawings and are an integral link between an idea and the finished product. CAD students will use plans, assembly drawings, and maps from notes and sketches. Upon completion of the program, the students will be able to produce correct drawings manually or with CAD programs, complete drafting assignments with minimum supervision, and communicate effectively in order to work in drafting team assignments. Employment is available in the Architectural Engineering Construction (AEC) and Manufacturing areas.
