

NCCER Core Certification of Completion

Texas Southmost College
Workforce Training and Continuing Education

This training will prepare individuals for entry-level positions on project sites and will provide foundational knowledge in safety, hand power tools, construction math, materials handling, construction drawings, and build employability skills. Upon completion of the courses, students will have the opportunity to earn an NCCER Core Certification.

COURSES	Hours
CNBT 1010: Basic Construction Safety (NCCER Core)	64
Total Contact Hours for Completion	64

Learning Outcomes:

- Understand workplace safety: Graduates should understand the importance of maintaining a safe workplace and comply with regulatory requirements and engineering limits.
- Graduates should also be able to create a Job Safety Analysis (JSA) for any project and stay compliant with OSHA regulations.
- Workplace injury prevention: Graduates should understand how to prevent workplace injuries, manage risk, and investigate incidents that happen on job sites.

Award

TSC Certificate of Completion
NCCER Core Certificate
